Thanks Sherry for sharing this email. I will be working on meeting up with Bexar County's newly elected judges to educate them on the reforms from the past and request their support to improve the system of guardianship. This is the time that everyone should send letters to the newly elected probate judges about your situations, supporting them to avoid any more families to experience what you all have. I remember Candice telling me that at a Conference Judge King told the attendees that Guardianship was not going to be the same anymore, well that can become true since he and the other pieces of shit judges have been unseated in Harris, Bexar, and Tarrant County, these bastards were the worsts, and they worked very close with the REPTL to write legislation to all their benefit. As we all know they are and have been better protected than the actual people guardianship was created and designed to protect. I watched through many legislative sessions how these bastards and the practicing probate attorneys were drooling at the mouth at every legislative session to get bills passed that only benefited them, either by protecting them from criminal exploitation or by civil immunities. Crazy shit, but now for those who really want to make a change the time will be in this next session to get involved and be vigilant to make changes. Contact your senators, and house representatives and get busy, this is the only way we are going to have any success, help the new judge learn and understand that the current system defeats the original intent and purpose of guardianship.

Keep up the fight! Thanks to all of you for your continued support for change, and I pray that you all have a very Happy New Year. Stay in touch

Debby

Subject: JAMES HOROWITZ PROBATE COURT 4

James... You are the only one of the new judges that have reached out to the families for help in making your court different from all the rest in the past. There is so much wrong with the guardianship program that it is not even funny. I and among many have lots of experience helping families going through the guardianship process. There should never be hundred or thousands in guardianship when the court could be in the business of helping families have the tools to deal with their complicated situations. Courts should never be in the business of creating guardianships. The attorneys and families are not taking advantage of the services that keep each individual with disabilities or incapacitated out of the system The probate courts and Guardianship is another means to guarantee attorneys money and power to abuse and exploit the family with no accountability along with nursing homes and Hospice. There are many thousands complaints each years to Dads about abuse- Exploitation in Texas

exposing Doctors- Facility-Hospice and more but only a handful is investigated Yet thousands are thrown into guardianships from families by APS being reported only to make money. The list goes on and on. I have ordered this movie and when I receive it I would love to share this DVD to all judges to show that they have a responsibility to Protect not Exploit our families.

Thank you for your Outreach
