Candy: I understand from Anita that you are abit concerned about the Living trust and the insurance policy. Everything in both is divided evenly by 1/5. Your share of the insurance policy is 50,000 if you wait. If you want your share now it will be just what the policy is worth now. Your share would be about 16,000. It can be done but it's quite a hassle. The stocks and stuff will be divided evenly. If you need money let me know. Did you know Carole has been let go her job.? I feel so sorry for her because she's at the age where most companies want younger people. She's gone back to school to get her cpa but that will take some time.
